

# AquaLock™

## Turf & Ornamental Anti-Transpirant

### PRINCIPAL FUNCTIONING AGENTS

Proprietary Blend of Polymeric Surfactants .....	30%
Water .....	70%
TOTAL .....	100%

### NONPLANT FOOD INGREDIENT

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

### PRECAUTIONARY STATEMENTS

Before using this product, read the entire label, including conditions of sale.

### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators or handlers of this product must wear long-sleeved shirt, pants, shoes and socks, chemical resistant gloves and splash-proof safety goggles. Consult the MSDS for further information.

### STATEMENT OF PRACTICAL TREATMENT

- If Swallowed:** Give large amounts of water to drink. Do not induce vomiting. Seek medical attention immediately.  
**If Inhaled:** Move user to fresh air and seek medical attention.  
**If In Eyes:** Flush with water for 15 minutes. Seek medical attention.  
**If On Skin:** Remove contaminated clothing. Wash skin contact area with plenty of soap and water.

### GENERAL INFORMATION

AQUALOCK is a unique wax dispersion that forms a thin, flexible, water-repellent layer on plant surfaces. AQUALOCK protects plants against drought, extreme temperatures, wind and sunscald. The water-based formulation can extend the shelf life of ornamental crops, cut flowers and Christmas trees by minimizing moisture lost to transpiration. Used as part of comprehensive water management program, AQUALOCK may extend watering intervals for turf and ornamental crops. AQUALOCK is safe to sprayers and will not clog screens or nozzles.

AQUALOCK IS DESIGNED FOR USE ON TURF, FOREST CROPS, ORNAMENTAL PLANTS, CUT FLOWERS, CHRISTMAS TREES AND OTHER SUITABLE CROPS.

### DIRECTIONS FOR USE

For best results, do not apply AQUALOCK when temperatures are below 40°F. Avoid applications to turf or ornamentals during periods of frost. Delay applications when rain or irrigation is anticipated. If plants are under drought stress, irrigate prior to application. Follow application rates and mixing instructions below. When tank mixing with other products, perform a jar-test to determine compatibility.

### APPLICATION RATES

**Turf:** Apply AQUALOCK at the rate of 2 to 8 ounces (59 to 236 ml) in 1 to 2 gallons (3.78 to 7.57 L) of water per 1000 square feet (92.9 m<sup>2</sup>) of turfgrass.  
**Ornamentals:** Apply AQUALOCK at the rate of 4 to 8 ounces (118 to 236 ml) in 1 gallon (3.78 L) of water. Make additional applications of AQUALOCK on an as needed basis.

### MIXING INSTRUCTIONS

When tank mixing AQUALOCK with other products, conduct a jar test prior to adding to the spray tank. In the absence of specific mixing instructions found on the pesticide label, fill the spray tank with at least 50% of the desired finished carrier volume. When premixing in a mixing vessel or inductor, fill with at least 20% of the desired finished carrier volume. While the carrier is agitating, add tank mix ingredients in the following order: 1) Compatibility agent if needed. 2) Dry formulations; (WP, DF, WDG, SP) and dry drift retardants. 3) Liquid formulations; liquid drift retardants and Flowable formulations (F and FL). 4) Microencapsulated and suspension concentrates (ME and SC). 5) Emulsifiable concentrates (E, EL or EC). 6) Solutions (S, L and LC), micronutrients, liquid or suspension fertilizers. 7) Adjuvants (COC, HSOC, MSO, NIS) and/or Water Conditioning Agents. 8) Finish filling to desired spray volume level and continue agitation.

### STORAGE AND DISPOSAL

Stable for extended periods at temperatures above freezing (32°F or 0°C). If product freezes, warm to room temperature before use. Store in original container only and do not reuse empty container. Rinse container thoroughly, disposing of rinsate and the container in accordance with federal, state and local regulations. Do not store near heat or open flame.

### CONDITIONS OF SALE

Read the information contained herein before buying or using this product. If the stated terms are unacceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling. Precision Laboratories, Inc. warrants that this material is reasonably fit for use as specified on this label. No agent or representative is authorized to make any other representations concerning this material. Unforeseen factors beyond Precision's control prevent elimination of risks in connection with the use of its chemicals. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though label directions are followed. Follow directions carefully. Timing, mixture, method of application, weather and other conditions are influencing factors in the use of this product and are beyond the control of the seller. Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the Company or any other seller for any and all losses, personal injuries or damages resulting from the use of this product shall be the purchase price paid by the user or buyer for the product involved.
