Uses & Features:

Country Club MD 20-0-10, the premier homogeneous greens grade fertilizer, utilizes Meth-Ex high activity methylene urea nitrogen that delivers a consistent and predictable long term feeding schedule. Country Club MD 20-0-10 also contains sea plant kelp meal and humic acid, both of which assist the turf plant in achieving its performance potential and aids in regeneration of healthy soils. Turf treated with these biostimulants will outperform untreated turf in overall quality and playability during stressful conditions.
