

EarthWorks™

Growth products for professional turf management.

- Stimulates root growth
- Reduces heat stress
- Microbial stimulant
- Available carbohydrates

2.5 gallons
Apply 4 to 12 oz
per 1000 sq ft

Potent-Sea

Biostimulant

-
- Fish and kelp blend
 - Humic acids
 - Vitamin package
 - Complex sugars

Potent-Sea

Biostimulant

Turf Maintenance

Apply 8 ounces per 1000 sq ft monthly throughout the growing season — preferably in split applications. On sand based soils weekly applications are very important. Increase rates during times of stress.

Fairways

Apply one gallon per acre, once a month, increasing rates and/or frequency when turf is under stress.

New Seedings

At time of germination apply 4 to 6 ounces per 1000 sq ft, repeating application in 3 weeks, followed by maintenance levels.

Lawn Care

Use one gallon per acre, 2 to 4 times per season, increasing rate when turf is under stress.

Ornamentals

Blend 4 to 6 ounces per gallon of water as a foliar, sprayed over the landscape every 4 weeks. Increase application frequency for stressed plants.

Avoid Mixing with excessive phosphorous or sulfur containing materials. Always perform a bench test for compatibility.

General Information

Potent-Sea is a blend of cold processed whole fish hydrolysate and north Atlantic sea kelp. By using a cold process, we are able to limit the destruction of enzymatic activity that occurs when heating meal products. We have added to this mix soluble North Dakota humic acids and complex carborhydrates. This combination provides the benefits of both fish and kelp meal, but is further enhanced by the addition of short and long chained carbon nutrients. Potent-Sea is loaded with macro and micro nutrients, amino acid, enzymes, anti-oxidants, gibberellic acid, cytokinins, vitamins and other bio-stimulants. Recently added to Potent-Sea is a proprietary fermentation product known as Bio-Net, which works as a powerful biological activator. This new formula is an extremely effective plant stress reducer and root stimulant as well as a rich source of carbohydrates. used on a regular basis as a bio-stimulant, Potent-Sea will provide significant support to any biological soil management program.

Condition of Sale

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorized to make warranty, guarantee or direction concerning this product.
2. Because the time, place, rate of application and other conditions of use are beyond Seller's control, Seller's liability from handling, storage and use of this product is limited to replacement of product or refund of purchase price.

Storage Precautions

Store in manufacturer's containers when possible. If not, store in polyolefin or polyethylene storage tanks. Do not store for extended periods in mild steel and only in approved fiberglass. Although stainless steel tanks are less prone to corrosion than mild steel, they are not recommended for extended storage. Do not use nylon fittings and valves. PVC or polypropylene valves and fittings are recommended.

CAUTION: KEEP OUT OF REACH OF CHILDREN

WARNING

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat, and/or skin. Avoid contact with the eyes, skin and clothing. If swallowed: induce vomiting by sticking finger down throat. Never give anything by mouth to unconscious person. Get medical attention immediately. If in eyes, wash eyes with plenty of clear water for at least 15 minutes. Get medical attention immediately.

Keep stored above 32°F or 0°C
