#### USE INSTRUCTIONS:

**Turf Maintenance:** Apply 2 to 8 oz. per 1000 sq. ft. weekly in 2 to 3 gal. of water. Bi-monthly applications can be made at the higher rate on heavier soils. On low CEC soils, a weekly program at the lower rate is suggested. For calcium deficient soils apply up to 8 oz. per 1000 sq. ft. in 3 to 5 gal. of water at weekly intervals during the growing season.

**Landscape uses:** 4 to 6 oz. in 2 gal. of water and drench around the base of trees, shrubs and flower beds every 4 to 8 weeks.

**Sodium Removal:** Drench the soil with a solution of 8 to 16 oz. per 1000 sq. ft. in a minimum of 5 gal. of water. Repeat these applications every 2 to 4 weeks until the problem subsides, then revert back to maintenance calcium rates.

Avoid Mixing with excessive phosphorus or sulfur containing materials. Always perform a bench test for compatibility.
