- Fish and kelp meals
- Surfactants
- Complete trace package

Trilogy

Total biostimulant

Turf Maintenance

Greens and Tees: Apply 12 ounces per 1000 sq ft every two weeks, increase frequency on heavily compacted soils or sodium rich soils.

Fairways and athletic fields: Apply 2 to 2.5 gallons per acre per month, increasing rates to 3 to 4 gallons per acre per month on compacted or problematic soils.

Lawn Care: Apply 1.5 to 2 gallons per acre 3 to 4 times per year on sites..

Ornamentals

Apply 8 ounces per 2 gallons of water drenched into the soil.

Transplants

Apply 10 ounces per 2 gallons of water drenched around roots at time of planting.

Trilogy can be tank mixed with most turf products, a bench test is always recommended.

General Information

Trilogy is the "TOTAL biostimulant" addressing plant, root and microbial needs. The "bio" in biostimulant addresses much more than just the plant. Trilogy addresses the needs of the entire plant/soil mix. In today's high pressure turf and ornamental markets, having a total biostimulant in one package will not only provide results, but will also make applications easier. Trilogy will reduce plant stress, open tight soils, release nutrients from the soil, sequester salts and promote deep rooting. Compare the quality and volume of ingredients in Trilogy to any other biostimulant and you will see the EarthWorks advantage.

Condition of Sale

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorized to make warranty, guarantee or direction concerning this product.
2. Because the time, place, rate of application and other conditions of use are beyond Seller's control, Seller's liability from handling, storage and use of this product is limited to replacement of product or refund of purchase price.

Storage Precautions

Store in manufacturer's containers when possible. If not, store in polyolefin or polyethylene storage tanks. Do not store for extended periods in mild steel and only in approved fiberglass. Although stainless steel tanks are less prone to corrosion than mild steel, they are not recommended for extended storage. Do not use nylon fittings and valves. PVC or polypropylene valves and fittings are recommended.

CAUTION: KEEP OUT OF REACH OF CHILDREN

WARNING

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat, and/or skin. Avoid contact with the eyes, skin and clothing. If swallowed: induce vomiting by sticking finger down throat. Never give anything by mouth to unconscious person. Get medical attention immediately. If in eyes, wash eyes with plenty of clear water for at least 15 minutes. Get medical attention immediately.

Keep stored above 32°F or 0°C
